1. Start your tour by exiting the Admissions Office (Wentworth Hall). Turn to your left to see the entrance of the Student Service Center (Williston Hall). The center houses the Financial Aid, International Student Services, Registrar’s, and Student Financial Services Offices. Turn to the right and walk down the hall to see the Center for Cooperative Education and Career Development.

2. Proceed up the stairs across from the Center for Cooperative Education and Career Development to the second floor of Wentworth Hall and visit a typical classroom.

3. Continue down the hall to your right and look out the window. Immediately across the street you will see Swaney Field, home to Wentworth Athletics. Beyond that you will see the Museum of Fine Arts and the skyline of Boston.

4. Return to the first floor and continue down the hallway past Admissions to Dobbs Hall where you will take the stairs down to the ground level.

5. To your right is the cutting-edge Gelfand Strength of Materials Lab. This space also features Materials Science and Nanotechnology labs. Straight ahead of you is Wentworth’s High-Tech Highway. The Altucher Computer Center features a range of industry standard equipment for networking and data storage. Students have access to the latest technology and gain practical experience related to cybersecurity, network engineering, and maintenance.

6. At the end of the hallway (Williston Hall) is the Manufacturing Center. This innovative facility serves as an applications lab for engineering students.

7. Exit the building into the West Lot and proceed to the corner of Huntington Avenue and Ruggles Street. Across the street you will see our newest residence hall — The Apartments at 525 Huntington Avenue. Opened in Fall 2014, 525 also houses the Office of Housing and Residence Life. Behind The Apartments at 525 are the Louis Prang/Vancouver Apartments which offer singles and doubles with an added level of independence for students.

8. As you continue uptown Huntington Avenue, Edwards Hall and Rodgers Hall will be to your left. To your right, you will see the MBTA’s Green Line (known as the “T”) running along Huntington Avenue. Nearby transit stops on the Green and Orange Line connect Wentworth easily to other areas of Boston.

9. Head to the leopard statue and look across Huntington Avenue to the residence hall, 555 Huntington Avenue. This building contains the Center for Community and Learning Partnerships. Located behind 555 Huntington Avenue, Evans Way and Tudbury Hall house first-year students. They face Evans Way Park and the Isabella Stewart Gardner Museum.

10. Behind the leopard statue is a path that leads to Baker Hall, a facility dedicated to first-year students and 610 Huntington Avenue, one of many suite-style residence halls. The Office of Public Safety is housed on the first floor of 610 Huntington Avenue.

11. Continuing along the walkway you will pass the C-Store, a convenience store shared with other schools in the Colleges of the Fenway.

12. You will pass one of Wentworth’s many Blue Light Phones on the right. These phones offer a direct connection with the Office of Public Safety.

13. Enter the Flanagan Campus Center which includes study, recreation, and activity spaces for students. Wentworth’s dining hall, Beatty Cafeteria, is upstairs. Wentworth’s library is located on the second floor of Beatty Hall. Renovated in 2016, The Douglas D. Schuman Library & Learning Commons is a dynamic, technology-driven space for students and faculty to collaborate and learn.

14. Exit to the quad and proceed along the walkway to your right. The Center for Engineering, Innovation, and Sciences (CEIS) is Wentworth’s newest academic building. This 75,000-square-foot facility includes laboratory and office space, as well as presentation and gathering areas for students, faculty, and staff. CEIS also houses Accelerate, our innovation and entrepreneur ship center. Accelerate offers programs where students gain entrepreneurial confidence and practice innovative thinking to make a tangible impact on the world.

15. Across from CEIS is the Nelson Recreation Center, which houses Tanzay Gymnasium, the main basketball court, and offices for the athletics program.

16. Continue down the pathway and cross Parker Street to the Annex, a complex of three buildings for Wentworth’s design programs and studios. The Annex also houses construction management and civil engineering labs.

17. To the left of the Annex is the Ira Allen Building. Ira Allen houses state-of-the-art laboratories and classrooms for the College of Arts and Sciences.
